Sherrie Brownell 2.0 out of 5 stars The mechanics of the system is inferior to earlier models. I have had a Bose music system for many 20 years the earlier models have a flip up top lid that allows you to easily remove or readjust a disc that is not running properly. For the new system you insert a disc, and you cannot get into the area where the disc is.

This new unit rejects any disc that is not standard so if the disc is slightly thicker it will not play. I inserted a new La Boheme CD, and the disc immediately became stuck in the unit. Over the past 6 months CDs often become stuck and I have to turn the unit off and on reset and sometimes resort to sticking an object gently into the slot to try and dislodge the CD. Each CD must be placed into the unit with the utmost care, so that it does not go into a failure mode. Really frustrating to deal with, and the unit was 500. I know this machine will fail, and it's just a matter of time. Sound is awesome, but the earlier design is so much friendlier and successful. Sure, it's cool to have the one touch top for on and off, but at the expense of the unit actually playing. No way! I'd rather have the old design that reliably works back. Another example of trying to make something that is attractive but doesn't really work. A gorgeous apple that when you bite into it, is bland and mealy. I big disappointment. I will go with another unit next time, if there is a competitor. This was not a feature in the first two Bose units and we do not want an alarm to sound. Bose customer service told us this was a defect, that the alarm should not sound at the end of the CD playing. We were instructed to ship it in for repair. This took quite some time. When it was returned it still sounded the alarm at end of the CD play. Our second round with Bose Customer Service initially confirmed that the alarm should NOT sound. Also, we were told that the first CS rep had not correctly recorded the defect that was supposed to be repaired. So the shipping and repair was a total waste of time and WORSE, it lulled us into delaying return of the unit through Amazon so we missed the AMAZON 30 day return deadline. After our second long phone session with another CS rep, who TWICE confirmed that alarm should NOT sound, they then changed their story to this being a new FEATURE.

We asked for our money back and they refused. To be fair, the sound is good. This is what Bose was historically known for. If you want to buy one of these units test it first at a real store and if you do buy one, buy it from a brick and mortar store where you get real customer service. Bose customer service is a joke and you will waste your time on the phone with nice but totally ineffective telephone operators in some other country with no knowledge of the product and no ability to resolve your issues. HOWEVER Amazon is amazing. This machine sucks. Paying big bucks for good sound when it

worked the CD ejection MUST work better. Bose needs to do better. Already waited 30 seconds, 30 minutes and 30 freaking days to get my CD back. After a couple years of frustration I decided to never buy BOSE again. EVER! Go with Onkyo CS265. Then yesterday, I noticed that it had gone silent and the display was black. Then the display flickered once, twice, went black again and stayed black. Unplugging the unit to reset and then plugging it into other, known good outlets in my House didn't bring it back from the dead. Im hoping Bose customer support will make this right. It took over an hour in total, over the course of three weeks, to straighten out what was being returned, the sending of the return labels. It is clear that this is an out sourced operation, so the language barrier contributed to the frustrations. Great device, well made, easy to use, excellent sound, but purchase through Amazon and not directly through manufacturer. This is great all over. If you old school like radio or CD. Or you like wifi or bluetooth. This has it all. The bass is great and can be adjusted from your phone. No need to antenna because this has great frequency. It was well worth the wait; very well constructed, and easy to operate with the included remote. And the sound!!! Im 76 years old, and my hearing has slipped somewhat over the years.

But listening to music so far jazz, classic rock, AND classical have all come to life for me. I could not be happier, and would recommend Bose in a heartbeat. One must have the remote control available at all times since none of the controls are on the machine. Love the minimalism of the device; no need for speakers, receiver, multiple wires, etc. Less dust collection. Sound is great of course. Sorry, we failed to record your vote.
